ASH Brain Health System Redesign
Campus & Continuum Clinical Strategies Work Group
May 2020

1. Charter Overview

The ASH Redesign Campus & Continuum Clinical Strategies Work Group is tasked with examining the current best practices locally and throughout the continuum to create recommendations of campus care and continuum needs. The group will also establish potential financial gains or requirements with the best practices and coordinate with other groups working on similar strategies. Lastly, the work group will provide strategies to assist hospital flow, for example establishing admission flow and step down care for people returning to the community. The group will develop principles to focus their goals into and develop strategies that will be shared with the Steering Committee for review and placed into a formal report to the Health and Human Services Commission.
